

N SAI VIGHNESH

Full-Stack Developer

Ravulapalem, Andhra Pradesh, India | +91 9059854218 | nsv2190@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (9.3 CGPA) with hands-on experience building and deploying full-stack web applications using React, Next.js, Spring Boot, and PostgreSQL. Built deployable project platforms with server-side rendering, REST APIs, and relational database management. Proficient in Docker, Kubernetes, and Jenkins for CI/CD automation. Integrates AI/LLM capabilities into web applications where applicable. Oracle Cloud certified in DevOps and Generative AI. National-level hackathon participant (Guidewire DEVTrails, Meta PyTorch OpenEnv).

PROJECTS

ClipFlow AI — Developer Productivity Dashboard

Feb 2025

React, Next.js, PostgreSQL, Vercel, AI/LLM Integration | [Live Demo](#) | [GitHub](#)

- Built and deployed a full-stack productivity platform on Vercel that aggregates coding activity into a unified analytics dashboard with personalized streak tracking.
- Implemented server-side rendering via Next.js with PostgreSQL for persistent user data and session management.
- Integrated an AI assistant that analyzes user-submitted algorithms and provides step-by-step hints and optimization suggestions.

Travel Planner — AI-Assisted Itinerary Builder

Dec 2025

React, Vite, Spring Boot, MySQL, Gemini API | [GitHub](#)

- Developed a full-stack travel planner with a responsive React frontend and Spring Boot REST API backend handling itinerary CRUD operations and user persistence via MySQL.
- Integrated Gemini API to power a conversational chatbot that generates personalized day-wise travel schedules based on user preferences, budget, and travel dates.
- Implemented user authentication, input validation, and error handling across the full request lifecycle from frontend form submission to database persistence.

TermBrain — Linux-Native AI Diagnostic CLI

Jan 2026 – Present

Python, Typer, Rich, g4f, SQLite, Linux, systemd | [GitHub](#)

- Built a Linux-native AI diagnostic CLI with diagnose, suggest-fix, doctor, security, monitor, history, and schedule command groups for terminal-first debugging.
- Implemented a regex-based log trimming pipeline that extracts error/fail/critical lines and recent context to fit large terminal logs into LLM-ready prompts.
- Integrated journalctl, pacman, systemctl, ss, SQLite caching, Rich live markdown streaming, and user-scope systemd timers while keeping fixes read-only and user-approved.

GAN-Based Synthetic Image Generator

Jan 2026

Python, PyTorch, DCGAN, Gradio, Hugging Face Spaces | [Live Demo](#) | [GitHub](#)

- Implemented vanilla GAN and DCGAN architectures in PyTorch to generate synthetic images of diseased plant leaves, augmenting limited training datasets for agricultural ML models.
- Deployed the generator as an interactive Gradio application on Hugging Face Spaces with CPU-optimized preprocessing for real-time inference.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, C++, SQL

Front-End: React.js, Next.js, HTML5, CSS3, Vite

Back-End: Spring Boot, REST APIs, FastAPI

Databases: PostgreSQL, MySQL, Supabase, SQLite

DevOps & Tools: Docker, Kubernetes, Jenkins, Git, Vercel

AI Integration: Gemini API, g4f, Prompt Engineering, PyTorch

EDUCATION

B.Tech, Computer Science & Engineering — KL University, Guntur, AP

Aug 2023 – May 2027

CGPA: 9.3 / 10

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified DevOps Professional | [Verify](#)

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | [Verify](#)

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | [Verify](#)

HackerRank Software Engineer Role Certification | [Verify](#)

HACKATHONS & COMPETITIONS

- Guidewire DEVTrails Hackathon 2026** — Built “GigShield,” a 3-tier AI parametric insurance platform for Indian gig workers with automated weather/AQI-based claim triggers. Stack: React, Spring Boot, FastAPI, Supabase, Scikit-learn.
- Meta PyTorch OpenEnv Hackathon x Scaler (Mar 2026)** — Developed robust Reinforcement Learning agent environments using Meta’s OpenEnv framework for complex continuous control scenarios.
- Design Thinking & Innovation @ KL-CIE (Dec 2023)** — Selected for Mock Shark Tank (Project Expo-3rd Edition) for “E-Waste Management” project, demonstrating design thinking and product pitch skills.
