

N SAI VIGHNESH

AI Engineer · Full-Stack Developer

Ravulapalem, Andhra Pradesh, India | +91 9059854218 | nsv2190@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (9.3 CGPA) focused on building practical system tools and AI applications. Experienced in computer vision with PyTorch and adding LLMs to full-stack and Linux environments. Skilled in building terminal tools, managing databases, and preparing text for AI models to read efficiently. Oracle Cloud certified in Generative AI and DevOps, with experience taking projects from raw data to live deployment.

PROJECTS

TermBrain — Linux-Native AI Diagnostic CLI

Jan 2026 – Present

Python, Typer, Rich, Llama 3.1, SQLite, Linux, systemd | [GitHub](#)

- Built TermBrain, a Linux CLI tool using local Llama 3.1 (8B) to help debug system issues, suggest automatic fixes, and explain terminal commands.
- Created a script to filter and summarize large system logs (Pacman, journalctl) so they fit into the LLM context window without using too many tokens.
- Added system monitoring tools, automated security checks for SSH logins, background scans using systemd, and a SQLite database to save command history.

GAN-Based Synthetic Image Generator

Jan 2026

Python, PyTorch, DCGAN, Gradio, Hugging Face Spaces | [Live Demo](#) | [GitHub](#)

- Trained DCGAN models in PyTorch to generate realistic images of diseased plant leaves, creating more training data for machine learning models.
- Tracked the training process by looking at loss graphs and comparing different model setups to get the best results.
- Deployed the generator as an interactive Gradio web app on Hugging Face Spaces so users can test it easily.

ClipFlow AI — Developer Productivity Dashboard

Feb 2025

React, Next.js, PostgreSQL, AI/LLM Integration | [Live Demo](#) | [GitHub](#)

- Integrated an AI assistant that analyzes user-submitted algorithms and provides step-by-step hints and optimization suggestions.
- Built and deployed a full-stack productivity platform on Vercel that aggregates coding activity into a unified analytics dashboard with personalized streak tracking.
- Implemented server-side rendering via Next.js with PostgreSQL for persistent user data and session management.

Travel Planner — AI-Assisted Itinerary Builder

Dec 2025

React, Vite, Spring Boot, MySQL, Gemini API | [GitHub](#)

- Integrated the Gemini API to power a conversational chatbot that generates personalized day-wise travel schedules based on user preferences, budget, and travel dates.
- Built the full-stack serving layer with a React frontend and Spring Boot REST API backend, implementing prompt engineering and response parsing for structured AI-generated itinerary output.

TECHNICAL SKILLS

AI / ML: PyTorch, Scikit-learn, LLM API Integration, NumPy, Pandas

Languages: Python, Java, JavaScript, C/C++, SQL

Back-End: Spring Boot, FastAPI, REST APIs, SQLite, Postgres

Front-End: React, Next.js, HTML/CSS, Gradio

Tools & Infrastructure: Linux OS, Docker, Git, CI/CD, Hugging Face

EDUCATION

B.Tech, Computer Science & Engineering — KL University, Guntur, AP

Aug 2023 – May 2027

CGPA: 9.3 / 10

Class XII (Intermediate) — Sasi Junior College, AP (BIEAP)

2021 – 2023

Marks: 94.1% (941 / 1000)

Class X — Sasi High School, AP (BSEAP)

2020 – 2021

Marks: 98.2% (589 / 600)

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | [Verify](#)

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | [Verify](#)

Oracle Cloud Infrastructure 2025 Certified DevOps Professional | [Verify](#)

AWS Certified Cloud Practitioner (CLF-C02) | [Verify](#)

HACKATHONS & COMPETITIONS

- Meta PyTorch OpenEnv Hackathon x Scaler (Mar 2026)** — Built a "Delivery Route Optimizer" simulation using Meta's OpenEnv, where an AI agent learns the fastest delivery paths while handling traffic, distance, and time limits through a reward system.
- Guidewire DEVTrails Hackathon 2026** — Built "GigShield," an AI insurance platform for gig workers that automatically detects fraud and triggers claims using machine learning.
- Design Thinking & Innovation @ KL-CIIE (Dec 2023)** — Selected for Mock Shark Tank for an "E-Waste Management" project, showing product pitch and design skills.
