

N SAI VIGHNESH

Full-Stack Developer

Ravulapalem, Andhra Pradesh, India | +91 9059854218 | nsv2190@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (9.3 CGPA) with hands-on experience building full-stack web applications. Skilled in creating frontend interfaces with React and Next.js, backed by Spring Boot REST APIs and PostgreSQL databases. Focused on building practical developer tools, clean user experiences, and reliable systems. Comfortable managing the entire software lifecycle, using Docker and CI/CD pipelines to deploy projects smoothly.

PROJECTS

ClipFlow AI — Developer Productivity Dashboard

Feb 2025

React, Next.js, PostgreSQL, Vercel, AI/LLM Integration | [Live Demo](#) | [GitHub](#)

- Built and deployed a full-stack productivity platform on Vercel that aggregates coding activity into a unified analytics dashboard with personalized streak tracking.
- Implemented server-side rendering via Next.js with PostgreSQL for persistent user data and session management.
- Integrated an AI assistant that analyzes user-submitted algorithms and provides step-by-step hints and optimization suggestions.

TermBrain — Linux-Native AI Diagnostic CLI

Jan 2026 – Present

Python, Typer, Rich, Llama 3.1, SQLite, Linux, systemd | [GitHub](#)

- Built TermBrain, a Linux CLI tool using local Llama 3.1 (8B) to help debug system issues, suggest automatic fixes, and explain terminal commands.
- Created a script to filter and summarize large system logs (Pacman, journalctl) so they fit into the LLM context window without using too many tokens.
- Added system monitoring tools, automated security checks for SSH logins, background scans using systemd, and a SQLite database to save command history.

Travel Planner — AI-Assisted Itinerary Builder

Dec 2025

React, Vite, Spring Boot, MySQL, Gemini API | [GitHub](#)

- Developed a full-stack travel planner with a responsive React frontend and Spring Boot REST API backend handling itinerary CRUD operations and user persistence via MySQL.
- Integrated Gemini API to power a conversational chatbot that generates personalized day-wise travel schedules based on user preferences, budget, and travel dates.

GAN-Based Synthetic Image Generator

Jan 2026

Python, PyTorch, DCGAN, Gradio, Hugging Face Spaces | [Live Demo](#) | [GitHub](#)

- Trained vanilla GAN and DCGAN models in PyTorch to generate realistic images of diseased plant leaves, creating more training data for machine learning models.
- Deployed the generator as an interactive Gradio web app on Hugging Face Spaces so users can test it easily.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C/C++, SQL

Front-End: React, Next.js, HTML/CSS, Vite

Back-End: Spring Boot, FastAPI, REST APIs

Databases: PostgreSQL, MySQL, SQLite, Supabase

Tools & Infrastructure: Docker, Git, Linux OS, CI/CD Pipelines, Vercel

AI/ML: PyTorch, LLM APIs (Gemini), Scikit-learn

EDUCATION

B.Tech, Computer Science & Engineering — KL University, Guntur, AP

Aug 2023 – May 2027

CGPA: 9.3 / 10

Class XII (Intermediate) — Sasi Junior College, AP (BIEAP)

2021 – 2023

Marks: 94.1% (941 / 1000)

Class X — Sasi High School, AP (BSEAP)

2020 – 2021

Marks: 98.2% (589 / 600)

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified DevOps Professional | [Verify](#)

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | [Verify](#)

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | [Verify](#)

AWS Certified Cloud Practitioner (CLF-C02) | [Verify](#)

HACKATHONS & COMPETITIONS

- Guidewire DEVTrails Hackathon 2026** — Built "GigShield," an AI insurance platform for gig workers that automatically triggers claims based on bad weather or pollution data. Stack: React, Spring Boot, FastAPI, Supabase.
- Meta PyTorch OpenEnv Hackathon x Scaler (Mar 2026)** — Built a "Delivery Route Optimizer" simulation using Meta's OpenEnv, where an AI agent learns the fastest delivery paths while handling traffic, distance, and time limits through a reward system.
- Design Thinking & Innovation @ KL-CIIE (Dec 2023)** — Selected for Mock Shark Tank for an "E-Waste Management" project, showing product pitch and design skills.
